

ENTERPRISE COMPLIANCE AND DATA PRIVACY

SECURE YOUR CUSTOMER AND EMPLOYEE DATA AND MEET ENTERPRISE COMPLIANCE REGULATIONS WITH GROUND LABS

THE CHALLENGE:

Data is the lifeblood of any large enterprise — and its biggest asset. Five of the world's six top publicly traded organizations are data companies; multi-billion dollar acquisitions are often made simply to acquire more data. In the next three years, the world will create more data than it did in the past 30 years, and across the board, the amount of stored data doubles every four years..

The global pandemic has forced businesses around the world to rapidly accelerate their digital transformation efforts. With more people working from home, we are seeing unparalleled levels of data creation and consumption. As a result of the pandemic, digital platforms have also become the top method for organizations to engage with customers.

Executive leadership and CISOs know that while increased data is a big asset, it is also a huge liability. The next data breach is a matter of when, not if. Large enterprises need to manage their customer and employee data in order to remain compliant — so it is critical to understand where that data resides in order to secure it. The rise of remote and hybrid work due to the pandemic, combined with trends like BYOD and multi-cloud storage frameworks, mean your data can be almost anywhere — on your network, in the cloud or on an employee's desktop.

GROUND LABS FOR ENTERPRISE DATA COMPLIANCE

Trusted by thousands of enterprise-scale businesses globally

Discover over 300 predefined and variant types of data, including PII types from all 27 EU countries in accordance with GDPR

Ensure compliance with GDPR, CCPA, PDPA, PCI DSS 4.0 and other regulations, including many regional and country-specific legislations

Thousands of companies trust us to discover their sensitive data, including Qantas, Air New Zealand and Virgin Atlantic

THE SOLUTION: ENTERPRISE RECON

Enterprise Recon is a smart data discovery solution by Ground Labs that enables organizations to find and remediate personally identifiable information (PII) and sensitive information across the broadest range of structured and unstructured data -whether it's stored across servers, on desktops, email, and databases, on premises or in the cloud.

A premiere PII scanning tool, Enterprise Recon empowers organizations worldwide to seamlessly discover all of their data and comply with an extensive range of data compliance standards, including GDPR, PCI DSS, CCPA, HIPAA, and Australian Privacy. These standards require organizations to have the ability to locate and secure PII data as well as information on gender, ethnicity, health, and even non-PII financial data.

Enterprise Recon is powered by GLASS Technology™, Ground Labs' proprietary award-winning technology. GLASS Technology™ is the quickest and most accurate data discovery software on the market, enabling PII scanning, data discovery, risk scoring, and data classification across the broadest set of platforms available.

Enterprise Recon natively supports sensitive data discovery across Windows, macOS, Linux, FreeBSD, Solaris, HP-UX and IBM AIX environments using agent, agentless and distributed options. Additional remote options also enable organizations to search for PII across almost any network, including EBCDIC IBM mainframes.

ENTERPRISE RECON BENEFITS

 **Identify more than 300 data types** including predefined and variants that include sensitive, personal and confidential data from over 50 countries.

 **Broaden your search with GLASS Technology™-powered custom data types** to meet even the most demanding internal data discovery requirements.

 **Scan PII quickly and instantly** through the architecture of the Enterprise Recon software with limited to no impact to your network.

 **Integrate seamlessly with existing DLP solutions** to strengthen your overall data loss prevention strategy.

 **Go beyond identification and remediation** — encrypt, mask, secure delete, quarantine and control access to sensitive and PII data — to achieve a true zero trust security posture.

 **Analyze your data mapping with compliance reporting, risk scoring and risk mapping** with cross-operability with MS Excel™, Power Bi, Crystal Reports, Tableau, Microsoft Information Protection (MIP) & more.

COMPATIBLE WITH ALL COMMONLY-USED DATA SOURCES

Ground Labs Enterprise Recon can discover data located in:

Cloud Storage Providers:

Amazon AWS (S3), Microsoft Azure Blobs/Tables/Queues, Dropbox, Box Enterprise, Rackspace Cloud Files, OneDrive for Business, Google Drive & SharePoint Online.

Email:

Exchange 2007+, GMail, HCL Notes, IMAP and Microsoft Office 365.

Databases / Server:

SharePoint Server, IBM DB2, IBM Informix, Microsoft SQL Server, MongoDB, MariaDB, MySQL, Oracle, PostgreSQL, SAP Sybase, SAP Hana, Tibero, Teradata, InterSystems Caché, Hadoop (see our website for a full list of supported databases)
